

Amy Young

Amy is a technician in the Bannasch Lab. She received a BS in Biology from Colorado State University in 2000 and an MS in Genetics from the University of California, Davis in 2003.

Currently, Amy is involved in the skeletal dysplasia, hyperuricosuria and chronic progressive lymphedema studies.

In her free time, she can be found horseback riding. When not immersed in the equine world, she enjoys playing softball and volleyball, reading, and traveling.
