

Carrie J. Finno, DVM, DACVIM

Graduate Student, Bannasch Laboratory

Carrie obtained her undergraduate degree in Biology at Emory University in 1999. She went on to veterinary school at the University of Minnesota and earned her veterinary degree in 2004. Carrie remained in Minnesota for another year and completed an internship in Large Animal Medicine and Surgery. She was then accepted by the University of California, Davis for a 3-year residency in Large Animal Internal Medicine, which she successfully completed in 2008. Upon passing her Board Examination in Internal Medicine, she was awarded diplomate status in the American College of Veterinary Internal Medicine (ACVIM). During veterinary school and throughout her internship and residency, Carrie remained actively involved in equine research, specifically in the fields of equine muscle disorders and neurologic disease. Carrie joined the Bannasch Laboratory in August of 2008 and is working on equine genetic disorders. She continues to work as an internist in the veterinary hospital at UC Davis. In her spare time, Carrie is a competitive three-day event rider with her horse, Kaiden.
